ROCK AND ROLL GEAR

Kungpow MUG300T Head & TWMC 2x12-TLo Cab

Thank you for your purchase of the Kungpow/TWMC Bass Stack Bass Amp by Granite Top Games. I sincerely appreciate your support, and I hope these models will help you in whatever project you are creating. They are designed to be highly performant and simple to work with.

If you have any questions, comments, or suggestions, please don't hesitate to email me at granitetopgames@gmail.com.

If you've enjoyed this asset and/or found it easy to use, please consider leaving a review on the Unity Asset Store.

The purpose of this document is to give an overview of the files included in this package and explain how the model and art files are set up.

This package includes:

KungpowTWMCBassStack_Basic_DemoScene: Scene showing the model prefab.

_DemoSceneComponents FOLDER: Models, Textures, Materials, Scripts for Demo scene background.

PREFABS FOLDER: KungpowTWMCBassStack prefab which has the cab, head, and casters all set up in a usable prefab. Dragging this into your scene is the easiest way to use this model package. The included prefab has a simple box collider on the whole prefab, but colliders can be added to the head, cab, and casters individually if you need a more complex collision.

MODELS FOLDER: KungpowTWMCBassStack.fbx which contains several meshes: KungpowMUG300THead, TWMC2x12-TLoBassCab, 3inCasterBase, 3inCasterArms, 3inCasterWheel. The 3 caster part meshes are duplicated and saved in the prefab in their correct positions.

TEXTURES FOLDER: TWMC2x12-TLoBassCab_Albedo.png, TWMC2x12-TLoBassCab_Normal.png, TWMC2x12-TLoBassCab_Metal.tga, KungpowMUG300TBassHead_Albedo.png, KungpowMUG300TBassHead_Emission.png, KungpowMUG300TBassHead_Normal.png, KungpowUG300TBassHead_Metal.tga

All texture maps are 1024x1024. The .tga files (metal maps) have the smoothness map in the alpha channel. The textures for the caster meshes are in the TWMC2x12-TLoBass-Cab texture files.

MATERIALS FOLDER: TWMC2x12-TLoBassCab_MAT, KungpowMUG300TBassHead_MAT

Materials are set up with texture maps and Smoothness and Normal values tweaked.
